Abimael Fernandez Ventura

Full Stack Developer with Laravel, Vue, .NET and AWS

abimaelfv@hotmail.com | Huánuco, Perú (remote, or open to relocating)
linkedin.com/in/abitechdev | github.com/abitech-dev

Full stack developer with a degree in Systems and Computer Engineering and 3+ years in web systems and integrations for Interbank and Scotiabank. As the sole developer, I built Tu Coach UDH, a course platform with more than 8,800 users.

SKILLS

- **Backend**. Laravel, PHP, MVC, C# and .NET, Python and Django
- **Frontend**. Vue.js, JavaScript, jQuery and Ajax, HTML and CSS, Inertia.js, Tailwind CSS, TypeScript, React, Angular
- **Data**. MySQL and MariaDB, SQL Server, PostgreSQL, Redis
- **Cloud and DevOps**. AWS, Terraform, Docker, Linux, Nginx, Apache, Git, GitHub Actions (CI/CD)

EXPERIENCE

Tecnovo Perú Soluciones S.A.C.

Full Stack Developer | Nov 2025 – Present
Software consultancy. I built and deployed to the cloud systems for more than 5 of its clients.

Language learning LMS with subscriptions (Laravel 12, MySQL, Redis, Gemini, Culqi). Subscription-based language learning platform (LMS), with payments through the Culqi payment gateway, SUNAT e-invoicing and AI grading.

- Automated releases with CI/CD in GitHub Actions, with about 6 production releases a week.
- Built AI grading (Gemini) for text, audio and video answers. It assessed 1,812 answers in 5 months.

Gold pawn and trading system (Laravel 12, Vue 3, MySQL, Inertia SSR, Playwright). Gold pawn and trading system, with cash desks per branch, a vault and bank reconciliation.

- Connected the system to the business's currency exchange software, so every transaction goes through the SBS anti-money laundering checks.
- Integrated a fingerprint reader so each customer signs contracts and sworn statements with their fingerprint, as anti-money laundering rules require.

Offline maintenance reports PWA (Laravel 13, Vue 3, TypeScript, Pest, Playwright). Installable web app (PWA), now in client testing, that lets technicians fill out and sign electrical maintenance reports on their phones, even without signal.

- Built the offline mode, so technicians can work without signal and their reports, with encrypted signatures, sync without duplicates once back online.

OLSA

Integration Software Engineer | Feb 2025 – Oct 2025
Technology vendor for Interbank.

- Built for Interbank, one of Peru's four largest banks, about 10 integration flows in IBM App Connect Enterprise, now in production, for its card system.
- Took each integration from development to monitoring, with ESQL, CI/CD in Azure DevOps, Docker containers, testing in Postman and Bruno, and tracking in New Relic.

Universidad de Huánuco

Digital Transformation Lab Lead | Jul 2024 – Feb 2025
University lab where student teams build software for the institution.

- Ran the lab and its computers. Under my lead, students built more than 10 projects for the university and the Huánuco regional tourism office.
- Coordinated about 12 students on the Graduation Copilot, which digitizes the degree process, and automated its deployment.
- Coordinated SmartLab, a QR-based system for lab entries and equipment bookings, which reached its testing phase.

Full Stack Developer, Office of the Vice-Rector for Research | May 2023 – Jun 2024
Office that runs the university's research, with its grant calls, procedures and courses.

Tu Coach UDH (Laravel 10, MySQL, Blade, Bootstrap 4.6, jQuery). Online course platform (LMS) at Universidad de Huánuco on research and thesis writing.

- Built it as the sole developer, and it has more than 8,800 users and more than 7,700 certificates issued across 4 courses.
- Thesis students who used it improved their academic writing, according to a study with 60 of them.

IT Corp Perú E.I.R.L.
Software Development Intern | Jan 2023 – May 2023
Software development company.

- Built the website and the DSpace 7 institutional repository of a teacher training school, required for its licensing by the Ministry of Education.
- Built Gestión EVOL, a system where about 50 SAP consultants logged their hours and that calculated their payments.

OWN VENTURES, PART-TIME

Arsy Innova S.A.C.
Full Stack Developer and Co-founder | Jul 2025 – Present
Education company behind Arsy Academy, for online courses, and Arsy Coworker, which connects companies with specialists.

- Built the single account (SSO with OAuth2) that lets each user sign in to every platform.
- Designed the architecture of the 4 platforms (Laravel 13, Vue 3, Docker) and put them into production, with Stripe and Mercado Pago payments.
- Built Coworker with a team of 3, designed to cut handling time per request from 71 to about 9 business hours.

ABItech Perú E.I.R.L.
Full Stack Developer and Founder | Jan 2025 – Present
Software company I founded, with its own products online and custom systems for education, healthcare and tourism clients.

Pilot SSH (Python, Django 5.2, Django REST Framework, React 19, MySQL). Cloud service (SaaS), now in testing, that controls who accesses each server and records what they do, with an in-browser terminal.

- Designed the REST API and the web terminal. Credentials are stored encrypted and the activity log cannot be altered.

abitech-payments-laravel (PHP 8.2, Laravel 12, Laravel 13, Stripe, Mercado Pago). Open-source Laravel package that integrates the Stripe and Mercado Pago payment gateways behind a single interface.

- Designed it with the Strategy and Factory patterns so a new gateway can be added without touching the app, covered by 199 automated tests.

EDUCATION

- **Master's in Software Engineering and Information Systems**, Escuela de Posgrado Newman, coursework completed in 2026
- **Professional Degree in Systems and Computer Engineering**, Universidad de Huánuco, 2026
- **Bachelor's degree in Systems and Computer Engineering**, Universidad de Huánuco, 2024

COURSES AND CERTIFICATIONS

- Diploma en Soft Skills y Habilidades Directivas, Escuela de Posgrado Newman y UNIR México, Jan 2026
- Claude Code in Action, Anthropic, Jan 2026
- Introduction to Model Context Protocol, Anthropic, Jan 2026
- Curso de Vue JS, Instituto Internacional de Software (ISI), Nov 2024 (120 h)
- SAP ABAP, iniciación a la programación, Logali Group, Oct 2024 (50 h)
- SAP, conceptos e iniciación, Logali Group, Oct 2024 (25 h)
- SAP Fiori, administración e iniciación, Logali Group, Oct 2024 (20 h)
- Desarrollo web en PHP, MVC, POO y MySQL, Udemy, Jul 2022 (73 h)

LANGUAGES

Spanish (Native), English (Elementary)
